

Management System	Montrose Port Authority – Environmental Policy Statement		
	Reference:	MPA/E/Po/001	
Environmental Policy	Version:	B1	
	Date:	20 February 2019	
	Authorised by:	Port CEO, Nik Scott Gray	

Montrose Port Authority' (MPA) objective is to maintain the balance in the harbour between commercial and environmental interests, at the same time maintaining a sustainable and commercially viable medium sized Trust Port.

The Authority are committed to continual improvement of their environmental performance by fulfilling their duties relating to conservation, regulation and enhancement of the Port and Harbour of Montrose and complying with relevant UK, European and International legislation.

In implementing this policy, MPA shall ensure;

1 Environmental Management

- Endorse the principles contained in the European Sea Ports Organisations Environmental Code of Practice.
- Assess and mitigate environmental risks for all aspects of the MPA stakeholders.
- Include measurable environmental objectives and targets in business plans.
- Conduct regular management reviews and audits to identify areas for improvement.
- Develop a sustainable procurement policy for the business.
- Record all significant environmental occurrences.
- Publish environmental performance in an annual environmental review.

2 Recourse Management

- Continues to monitor and where practicable reduce resource consumption.
- Seek opportunities to apply innovative technology and techniques to reduce emissions and energy consumption.

3 Waste Management

- Continually assess re-use, recycling and waste minimising opportunities.

4 Communication and Training

- Communicate with employees, contractors and regulators to ensure people are aware of their roles and responsibilities, and where competent in performing them.

5 Pollution Prevention and Control

- Ensure that contingency plans and controls are in place and regularly reviewed and tested, to endeavour to prevent spills of oil, chemicals or potentially contaminating materials.
- Apply best available techniques, without involving disproportionate costs, to plant acquisitions, facilities and activities to advance pollution control and emissions reduction.
- Pursue good housekeeping policies to ensure tidiness on the Port estate.
- It is Montrose Port Authority's policy for the 'polluter' to pay for the cost of clean-up and disposal

The policy will be reviewed to embrace changes in MPA's activities and is endorsed by the current Chief Executive of Montrose Port Authority.
